Southeastern Oklahoma State University Wireless Network Connection Instructions

1. Go to your device’s Wi-Fi settings to connect to a wireless network.
   a. Student housing residents should connect to the SE_Housing network.
   b. Students on the main campus should connect to the SE_Wireless network
2. Type southeastern (case sensitive) for the Security Key/Password.
3. A screen will display the Southeastern Wireless Login Page.
   a. To connect to the network as a student, you will need to select Student as your User Type and enter your student username and password used to log into campus computer labs.
   b. To connect to the network as a Faculty/Staff member, you will need to select Faculty/Staff as your User Type and enter your Faculty/Staff username and password used to log into campus computers.

Devices without web browsers – such as gaming consoles, Kindles, Apple TVs, Rokus, etc. must be registered before use on the University’s wireless networks. To register, go to http://www.se.edu/netreg
You can log in on as many different devices as you need using your login credentials
The SE_Guest network is for intended for guests of the campus to have temporary internet access. This network has limited bandwidth and access to campus resources. For the best wireless experience, students and faculty/staff should always use SE_Wireless or SE_Housing networks!

For more information, visit the Student IT Homepage under Current Students at http://www.se.edu.
