Occupational Safety and Health receives donation of air sampling pumps and batteries

Student working with pump in laboratory with additional pumps and batteries arrayed in background. Pictured from left to right: Seth Finch, Donald Dancer, Shannon Henson and Matthew Carney

The Department of Occupational Safety and Health recently received 19 air sampling pumps, model HFS 513A and 32 spare batteries from Sid A. Edgar, CSP Senior Manager, Environment, Health & Safety AT&T Services, Inc. It is estimated that the value of the donated materials is approximately $20,000.

This gift is particularly timely as pumps currently used in the Industrial Hygiene laboratories had reached the end of their service life and were in need of replacement. Generous gifts like this from the safety community and our alumni enhance our ability to enrich the students learning experience in the field of Occupational Safety and Health. Our heartfelt thanks go to not only Sid Edgar and AT&T Services Inc. for their contribution but to others who, in the past, have supported the program here at Southeastern Oklahoma State University.

Occupational Safety Students Attend Conference

Nine Occupational Safety & Health students recently attended the American Society of Safety Engineers 39th annual professional development conference in Dallas, Texas. This year’s event was held at the Texas Scottish-Rite Conference Center and featured several speakers from the occupational safety and security profession who spoke on topics such as transportations safety and college campus security. Attending the conference were Brian Lauer, Chris Moore, Shana Alberty, Jonathan Huggins, Taylor Marshall, William Lohrman, Ashley Madison, Rhonda Stinson, and Carrie Williamson. The trip was sponsored by Dr. Wayne Jones.
ASSE Student Chapter Meeting

February 14th, 2012
Guest Speaker: Dr. Chris Bradshaw
Attendance: 58!
