Summary Comments

The program's dedication to improvement is clear. The data collected from their assessments are shown to be analyzed and plans to tweak the program for more optimal outcomes for students is shown in the summary.

The use of the National Certification Exam is a good assessment of the overall program but are there any assessments in place throughout the course of the program to determine and monitor student progress and preparation?

The reliance on the NCE for program assessment provides only limited measures of assessment for each learning outcome. In addition, the measures could be potentially be varied and include both direct/indirect and/or qualitative/quantitative measures.

Nice job identifying and addressing an action plan for improvement of identified concerns.
