

9.1 Vocabulary

**Across**

3. two parallel lines are cut by a transversal eight angles
5. The ray that makes up the angle
8. $x=180^*$
9. two lines that do not lie in the same and do not intersect
12. two straight lines intersect the non adjacent angles
14. the sum of their measures is 180^*
15. line that intersect two different lines (line 1 and line 2) at two different points
16. $x=90^*$
17. common vertex and a common side but no common interior points
18. Greek words ge meaning earth, and metron meaning measure
19. eight pairs of supplementary angles are formed

Down

1. the sum of their measures 90^*
2. $90^* < x < 180^*$
4. the point common both rays
6. angles are measured
7. the union of two rays with a common end point
10. the amount of rotation from its initial side to its terminal side
11. Two planes don't intersect
13. $0^* < x < 90^*$
