

Drug and Alcohol Abuse Prevention Program 2023

Southeastern Oklahoma State University believes that student success and achievement requires vigilance and effort on the part of the University to promote healthy living and learning. We affirm that we have a role in promoting an environment conducive to education and that actively discourages drug and alcohol abuse. We commit to prevention, developmental student conduct, and effective intervention for students at risk for these behaviors.

Southeastern Oklahoma State University is committed to compliance with the Drug Free Schools and Communities Act, and a campus culture that reduces alcohol and drug use, abuse, and illegal conduct. This commitment includes the development, enforcement, and continual evaluation of policy and programming, and promotion of awareness. Southeastern will continue to host and promote alcohol-free events and housing and promote student learning opportunities in regard to alcohol and drug abuse. Southeastern is committed to offering primary wellness and counseling options to students who are at risk or abusing alcohol and other drugs.

As codified in local, state, and federal laws, and the rules and regulations of the Regional University System of Oklahoma (RUSO), Southeastern Oklahoma State University prohibits the unlawful possession, use, or distribution of illicit drugs in buildings, facilities, grounds or other property owned and/or controlled by the University or as a part of the University activities. Additionally, no alcoholic beverages, including 3.2 beer, is allowed in student spaces on the Southeastern campus, including

dorms, fraternities, sororities, stadiums/arenas, no matter the age or student status. Southeastern limits the advertising and alcohol related displays in residence halls and other student spaces through Residence Life policy and flyer approval procedure. We are committed to reporting all alcohol and drug related crimes through standard Clery Act procedure so that the campus community is aware of those incidents.

Student drug and alcohol policy provisions can be found in the Student Handbook, updated annually and available online at [<https://www.se.edu/studenthandbook/>]. Faculty policy provisions can be found in the Academic Policies and Procedures Manual, Section 7.1. [<https://www.se.edu/humanresources/wp-content/uploads/sites/28/2019/05/academic-policies-and-procedures-1.pdf>]. Staff policy provisions can be found Administrative Policies and Procedures Handbook [<https://www.se.edu/human-resources/wp-content/uploads/sites/28/2019/05/Employee-HandbookRev-11-09-2015-1.pdf>]. These drug and alcohol policies will be updated or reviewed, at a minimum, in response to data and information gathered through the biennial review process in accordance with this policy.

Students who are also employees may be held to the standards applicable in both sets of policies. In response to the passage of State Question 788, the medical Marijuana Legalization Initiative, Southwestern Oklahoma State University stakeholders met to discuss the possible implications and outcomes for the Southeastern community. During this meeting, discussion ranged from possible residential living and learning scenarios to classroom interactions. A secondary group, the student conduct committee, investigated possible policy and sanctioning fluctuations. In the end, it was concluded that no policy change will occur in that Southeastern receives federal funding and therefore must abide by the federal Drug Free Schools and Communities Act Amendments of 1989. Thus, Southeastern will continue to enforce its current policy related to the use, possession, or distribution of marijuana on its campus.

Drug and Alcohol Abuse Prevention Plan Administration

The Drug and Alcohol Abuse Prevention Program Committee must meet quarterly (or once a semester) to evaluate and discuss each component of our multifaceted and campus wide programs. This committee is housed in the Division for Student Affairs and convened by the Chief Student Affairs Officer or their designee. Members of the committee shall be drawn from Human Resources, Student Affairs, Athletics, Academics, and other departments as appropriate. The purpose of this committee will be to oversee the overall planning and implementation of all drug and alcohol abuse prevention components.

Education Programming Components

The Southeastern Oklahoma State University Counseling Center provides counseling services to students struggling with alcohol and drug related matters, and is capable of referral services to any faculty, full-time, and part-time staff that are struggling with alcohol and drug related matters. Their contact information shall be included in the annual DFSCA disclosure.

Vector Solutions is an online educational program to address the unique challenges and responsibilities of college life for students surrounding alcohol and drugs. It also has an educational platform available to educate faculty and staff around substance use. Currently the program is utilized for sanctions related to drugs and alcohol. College Success instructors are made aware that the material may be utilized in their classes. The program is at no individual cost to the campus community.

Learn to Live is an online supplement to counseling services. It provides Cognitive Behavioral Therapy (CBT) programs to our students all over the United States. Students participate in self-guided modular programs, including Substance Use. They screen for risk and the program recommends modules based on screening results. Individuals may also choose to take a program without it being recommended on the screening. Students who need additional support may also reach out to a program coach for guidance and support.

Campus Well is an online campus magazine to which Southeastern subscribes that addresses a multitude of health-related issues including drug and alcohol informational articles. This publication may be accessed by going to <http://readsh101.com/se.html> and is delivered to student email inboxes monthly.

National College Health Assessment is completed every-other year to assess many health and wellness issues that affect our students. This instrument allows us to see what educational gaps and individual needs need to be addressed.

Springapalooza is an event that happens the week before spring break every year in the Atrium of the Student Union during the hours the cafeteria is serving dinner. During this time, students are educated on safety tips for various circumstances that could possibly leave them vulnerable to assault.

Camp SE is an orientation camp that is held every summer before the fall semester begins. Alcohol and drug abuse and prevention education will be provided during this orientation session.

Classroom Instruction: Instructors will be encouraged to include drug and alcohol abuse prevention education in their curriculum.

Customized educational outreach is offered throughout the year as requested through classrooms and other campus outreach initiatives, and periodically as part of health outreach programming. Additional outreach is provided through ongoing programming in Housing and Residence Life, The Office for Student Life, and Student Wellness Services.

Mandatory Annual Notification Procedure

To comply with Part 86 of the Drug-Free Schools and Campuses Regulations, Southeastern will produce an annual notice to be communicated to all students, prospective students, faculty, and staff at the beginning of each Fall Semester. A similar notice shall also be communicated to any new and prospective students or employees who matriculate after the date of annual distribution. Distribution shall be in writing and may be accomplished through electronic communication unless the University has a reason to know that the individual cannot use that method of communication, in which case the communication shall be made in an alternative format. The annual notification shall include:

1. Southeastern's expected standards of conduct, including a summary of policy for alcohol and other drugs.
2. Possible legal sanctions for students, faculty, and staff for violation of the expected standards of conduct.
3. Statements or summaries of the health risks associated with the abuse of alcohol and other drugs.
4. Southeastern's DAAPP shall be available to students, staff, and faculty.
5. Southeastern's institutional sanctions for violation of the expected standards of conduct.

The Chief Student Affairs Officer shall designate an individual responsible for this annual notification to the campus community.

Biennial Review Policy and Procedure

To comply with regulations, Southeastern must conduct a biennial review of its DAAPP in order to determine effectiveness and consistency of sanction enforcement, and in order to identify any necessary changes and/or improvements. A copy of the biennial review report shall be communicated to the U.S. Department of Education or its representative upon request. The Chief Student Affairs Officer shall assemble a committee of appropriate personnel and/or stakeholders to produce the biennial review report in a timely manner, or shall designate an individual to do so. This committee shall meet throughout June of each year and plan to produce a report by July 15 of each odd numbered year.

- The biennial review shall include:
 - An inventory and description of applicable drug and alcohol policies, programming, metrics associated with various programming models used, and student conduct metrics applicable to the two-year period.
 - A summary of policy and program areas that need improvement, and explanations of policy and programs that should remain unchanged.
 - A copy of the two most recent mandatory annual notifications. ○ A review of the distribution of the mandatory annual notifications and whether the distribution was successful. ○ Recommendations for revision of DAAPP policy or the language of the annual notification.

- Discussion of sanctions and the consistency of sanctioning procedure and outcomes.
- A summary of any available student or staff self-reporting on drug and alcohol usage and abuse. ○ AHCA data.

Calendar of the Biennial Review procedure:

- June 1 (of each year): Chief Student Affairs Officer requests to various campus offices for information about their portion of the DAAPP, including statistical data. The review committee shall be assembled and begin evaluating this information in regularly scheduled meetings.
- July 15 (odd numbered years): Production of the Biennial Review Report, complete with recommendations of improvements to the DAAPP.
- Fall : (odd numbered years): The Biennial Review Report shall be made available to all members of the campus community and the Federal Department of Education.

Findings of the 2023 Biennial Review Report of the Southeastern Oklahoma State University’s Drug and Alcohol Abuse Prevention Programs:

After reviewing the information collected on all drug and alcohol abuse and prevention across the University landscape, we have determined that our educational programming and awareness efforts have benefited from a centralized strategy. The coordination recommended in 2015, 2017, 2019 and 2021 reviews strengthen the program. Policy, sanctioning and disclosures have been integrated into standard operating procedure and clear lines of responsibility have been established. The following conclusion can be made:

- Each semester the DAAPP Committee members should review, evaluate and update each component of their drug and alcohol related programs.
- An annual review of policy and sanctioning regarding alcohol and drugs should be completed for alignment and should be submitted to the DAAPP committee by July 1 each year. Policies and practices will be updated in advance of the academic year.
- The non-student campus alcohol policies are underdeveloped and need to be revised.
- A review of current education modules should be done annually with updates and additions made prior to each academic year.
- Continuing research and discussions must be had as the new medical marijuana laws are implemented. Attention will be given to best practices regarding the policy, practice and implementation of these laws.

DRUG FREE SCHOOLS AND COMMUNITIES ACT NOTIFICATION

Dear Southeastern Students, Faculty, Staff, and Community,

The Drug-Free Schools and Communities Act Amendments of 1989 require that the University must advise faculty, staff and students of relevant laws pertaining to the illicit manufacture, possession, distribution, and usage of drugs and alcohol. This disclosure is to notify you of penalties for violations of Oklahoma and Federal statutes, the health risks associated with the usage of controlled substances, and the student conduct penalties associated with the manufacture, possession, distribution, and usage of controlled substances.

Standards of Conduct and Institutional Sanctions

Student Conduct:

In accordance with the Student Handbook and Code of Conduct, The use, possession, manufacturing, distribution, and/or being under the influence of alcoholic beverages and/or low point beer, as defined by Oklahoma Law, on the campus or at any on-campus activity sponsored by or for a student organization or any other university sponsored activity for students is not permitted. The use, possession, manufacturing, distribution and/or being under the influence of controlled dangerous substances, or controlled substances as defined by Oklahoma law, except as expressly permitted by law and/or University policy is not permitted. The inappropriate use, misuse, or abuse of prescription or over-the counter medications is forbidden.

Student Sanctions:

The violation of this student policy can result in reprimand, conduct probation, removal from residence halls, mandatory treatment or rehabilitation at the student's own expense, and can result in sanctions up to and including suspension or expulsion from the university.

Faculty Conduct:

In accordance with the Academic Policies and Procedures Manual, the illegal use, sale, or possession of alcohol, narcotics, drugs, or controlled substances while on university property or during any university activity is prohibited. Any illegal activity or substances will be reported to the appropriate law enforcement agency and may result in criminal prosecution. Employees who are under the influence of alcohol or drugs, or who possess or consume alcohol or drugs on the job, have the potential for interfering with their own, as well as their co-workers' safe and efficient job performance. Any university employee who is convicted of any federal or state criminal drug statute for drug related misconduct in the workplace must report the conviction within five (5) days thereafter to the Human Resources office.

Faculty Sanctions:

Such conditions will be proper cause for disciplinary action including employment probation, mandatory treatment or rehabilitation at the employees own expense, and up to and including termination of employment.

Staff Conduct:

In accordance with the Administrative, Professional, and Support Staff Handbook, the illegal use, sale, or possession of alcohol, narcotics, drugs, or controlled substances while on university property or during any university activity is prohibited. Employees who are under the influence of alcohol or drugs, or who possess or consume alcohol or drugs on the job, have the potential for interfering with their own, as well as their co-workers' safe and efficient job performance. Any university employee who is convicted of any federal or state criminal drug statute for drug related misconduct in the workplace must report the conviction within five (5) days thereafter to the Human Resources office.

Staff Sanctions:

Any illegal activity or substances will be reported to the appropriate law enforcement agency and may result in criminal prosecution. Violation of conduct standards are cause for disciplinary action up to and including termination of employment. University officials reserve the right to require drug testing when there is reasonable cause to believe that an employee is under the influence of drugs.

Medical Marijuana Statement:

In June 2018 , State Question 788 became law in Oklahoma. This state question was an initiative to legalize medical marijuana. Despite the passage of State Question 788, the use, possession, sale, or distribution of marijuana (including medical marijuana, edibles, and products containing marijuana) on any university owned or controlled property or at any university event remains illegal pursuant to the Controlled Substances Act, the Drug Free Schools and Communities Act, and the Drug Free Workplace Act and against Regional University System of Oklahoma (RUSO) policy. You may not bring marijuana on any university property or to any university event, smoke or consume marijuana or any product containing marijuana on any university property or at any university event, and you may not come to class or work under the influence of any illegal substance including marijuana.

Even though medical marijuana is now legal under Oklahoma law, it remains illegal under federal law. As a recipient of federal funding, Southeastern Oklahoma State University must abide by federal law which prohibits the unlawful manufacture, distribution, possession, and use of illegal drugs including medical marijuana.

Regardless of having a license for medical marijuana, its use on campus or at university events is strictly prohibited and violation of RUSO policy regarding controlled substances such as marijuana may result in disciplinary action.

Relevant State and Federal Laws

Students, faculty, and staff who violate Southeastern's drug and alcohol policies are simultaneously subject to criminal sanctions provided by federal, state, and local law. This is a summary of those legal sanctions:

Programs Available to Students Faculty and Staff

Education Programming Components

The Southeastern Oklahoma State University Counseling Center provides counseling services to students struggling with alcohol and drug related matters, and is capable of referral services to any faculty, full-time, and part-time staff that are struggling with alcohol and drug related matters. Their contact information shall be included in the annual DFSCA disclosure.

Vector Solutions is an online educational program to address the unique challenges and responsibilities of college life for students surrounding alcohol and drugs. It also has an educational platform available to educate faculty and staff around substance use. Currently the program is utilized for sanctions related to drugs and alcohol. College Success instructors are made aware that the material may be utilized in their classes. The program is at no individual cost to the campus community.

Learn to Live is an online supplement to counseling services. It provides Cognitive Behavioral Therapy (CBT) programs to our students all over the United States. Students participate in self-guided modular programs, including Substance Use. They screen for risk and the program recommends modules based on screening results. Individuals may also choose to take a program without it being recommended on the screening. Students who need additional support may also reach out to a program coach for guidance and support.

Campus Well is an online campus magazine to which Southeastern subscribes that addresses a multitude of health-related issues including drug and alcohol informational articles. This publication may be accessed by going to <http://readsh101.com/se.html> and is delivered to student email inboxes monthly.

National College Health Assessment is completed every-other year to assess many health and wellness issues that affect our students. This instrument allows us to see what educational gaps and individual needs need to be addressed.

Springapalooza is an event that happens the week before spring break every year in the Atrium of the Student Union during the hours the cafeteria is serving dinner. During this time, students are educated on safety tips for various circumstances that could possibly leave them vulnerable to assault.

Camp SE is an orientation camp that is held every summer before the fall semester begins. Alcohol and drug abuse and prevention education will be provided during this orientation session.

Classroom Instruction: Instructors will be encouraged to include drug and alcohol abuse prevention education in their curriculum.

Customized educational outreach is offered throughout the year as requested through classrooms and other campus outreach initiatives, and periodically as part of health outreach programming. Additional outreach is

provided through ongoing programming in Housing and Residence Life, The Office for Student Life, and Student Wellness Services.
