

General and Direct Disclosure for On-Campus Programs Designed to Meet Educational Requirements.

The following document is designed to serve as the general disclosure to out-of-state students regarding the educational requirements that could possibly lead to licensure. It also serves to detail the direct notification processes.

The on-campus undergraduate program offered by SE that could be expected to lead to a state's certification or license directly upon graduation is Teacher Education. The on-campus graduate program is Clinical Mental Health Counseling. Accounting is included in the general notification for reasons stated below.

For direct notification, the location of the student was provided by the Office of the Registrar. The location was determined by the student's listed home address. Current and prospective students who reside in states that are "unknown" or "no, SE's program does not lead to certification" was directly notified and will continue to be directly notified each July and January by email. The list was determined by students declared major and included prospective students (admitted but not enrolled) and current students. This general notification will be updated as more information is gained. The date of the original posting and the modified dates will be provided at the end of the document.

Teacher Education:

As of July 2021, the majority of out-of-state Teacher Education majors were from the state of Texas (N=72). The current Teacher Education program at SE meets the educational requirements for teacher certification in the state of Texas. Three (3) students admitted and/or enrolled for summer/fall 2021 are from other states (2 AR, 1 FL). Those three students were sent an email (direct notification)* on July 26th, 2021 notifying them that we are unable at this time to determine if the educational requirements meet their states requirements. Currently, SE is unable to determine if the current teacher education curriculum meets the requirements in any states other than Oklahoma and Texas.

The following link is provided to give current and prospective students the location of licensure information in their individual state.

Accounting

As of July 2021, the majority of out-of-state undergraduate Accounting majors were from the state of Texas (N=17). Two other students enrolled for summer/fall 2021 are from AR and CA. While the Certified Public Accountant is the most recognized certification, multiple certifications exist for those who combine a degree in accounting with work experiences. For all states, a 124-credit hour bachelor's in Accounting is not sufficient to become a Certified Public Accountant. Given this is considered common knowledge in the field and many accountants are employed with no type of certification, a direct notification was not sent to students. However, we believe that a general notification is helpful to students. The following links are provided to give current and prospective students the location of licensure information in their individual state.

Common Accounting Certifications

Texas State Board of Public Accountancy

<http://www.tsbpa.state.tx.us/>

Nursing

SE does not offer a degree designed to lead to nursing licensure nor does it offer any nursing-specific courses. SE does offer courses that count as nursing pre-reqs (such as anatomy), but these courses serve multiple majors with multiple goals. SE provides students lists of required courses that can be transferred to different institutions. Students seeking a BSN and attending SE will typically transfer to East Central University. Those seeking LPN or RN will typically transfer to Murray State College or Grayson College. Students should reach out to those institutions for questions related to licensure in other states.

Counseling/Psychology

As of July 2021, the majority of out-of-state Clinical Mental Health Counseling (CMHC) majors were from the state of Texas (N=10). Four (4) students were admitted for summer/fall 2021. They are from IL, MO, NC and NY. These students were sent an email (direct notification)* on July 26th, 2021 notifying them that we are unable at this time to determine if the educational requirements meet their state's requirements.

The curriculum is specifically designed to meet the educational requirements for the Oklahoma Licensed Professional Counselor (LPC).

After fall 2020, SE no longer participates in CACREP. Currently, **Kentucky, Florida, and North Carolina** require graduation from a CACREP program, so the SE CMHC program does not meet the requirements in those states.

SE is unable to determine if the current Clinical Mental Health Curriculum meets the requirements in any states other than those mentioned above.

<https://publish.smartsheet.com/45df46c6e87a424b9db53940a3174542>

SE offers a BA in Psychology. It is not the expectation of the program that this degree alone will lead to any type of licensure. This is evidenced by the fact that the CMHC program does not require a degree in psychology (or any helping profession) to be admitted into the program.

Distance Education Direct Disclosure

Before out-of-state students enroll in an online graduate program that leads to certification (Educational Leadership: Professional or School Counseling), they are required to initial/sign a document stating we have notified them of the relationship between our program and their individual state certifications.
